Coastal Outsourced Solutions Continues with Growth and Expansion

FAIRHAVEN, MA – August 3, 2021– Coastal Outsourced Solutions (COS) is excited to announce they are continuing to grow by partnering with three new clients and expanding the relationship of two current ones. This continued momentum brought COS into a new state, as they are excited to be servicing New Jersey for the first time. This comes as COS continues to expand from outside of their original New England footprint as the demand of their services grows.

Proponent Federal Credit Union out of Nutley, New Jersey, has proudly partnered with COS for both their collections servicing and Coastal Payment Solution (CPS) offerings. City of Boston Credit Union has also teamed with COS as a collections partner, marking the beginning of an exciting new partnership. Looking for a payment solution which fit their unique member needs, Harvard University Employees Credit Union is now also offering CPS to their members as they partner with COS.

The expansion of relationships is a particular point of pride for COS as they strive to offer top notch service to their partners. COS is pleased announce the addition of CPS to both Achieve Financial Credit Union and Fidelity Cooperative Bank's current services. CPS' platform supports clients in improving efficiency and streamlining operations while offering their borrowers a way to easily make their loan payments from deposit accounts outside of their institution.

"COS is excited to welcome these new partners and takes pride in providing a broad suite of support solutions to financial institutions around the country. We are excited to partner with new institutions and growing the relationships of current ones. We are dedicated to providing them all with the highest level of service and client care", said Geralyn Marcinko, President of Coastal Outsourced Solutions.

About Coastal Outsourced Solutions:

Coastal Outsourced Solutions (COS) was developed to service banks and credit unions while assisting in filling the servicing gaps many institutions experience. Headquarters based in New England, COS experience staff takes pride in providing high quality service to their clients' and their members/ customers.
